Android studio typography. How to find typos in android studio. Android studio suppress typo. Android studio add typo. Typo in word android studio. Android studio typo language. Disable typo android studio. Android studio ignore typo.

If you do not want spell check feature that is enabled by default in IntelliJ Android Studio IDE then follow the below-given steps. Go to Android Studio -> Preferences on your Mac OS X (Should be Window -> Preferences on Windows OS) Now look for Inspections (if you cant trace it just use the Search) Now look for the Spellings check box and uncheck it (this also unchecks the Typo) Apply and Close Thats it!! You would now not see any Typo or spelling correction highlights in Android Studio Disable Spellings feature Android Studio More Posts related to Android-Studio, More Posts: class Typography Material Design type scale. The Material Design type scale includes a range of contrasting styles that support the needs of your product and its content. The type scale is a combination of thirteen styles that are supported by the type system. It contains reusable categories of text, each with an intended application and meaning.

Typography(defaultFontFamily: FontFamily, h1: TextStyle, h2: TextStyle, h3: TextStyle, h4: TextStyle, h5: TextStyle, h6: TextStyle, subtitle1: TextStyle, subtitle2: TextStyle, body1: TextStyle, body2: TextStyle, button: TextStyle, caption: TextStyle, overline: TextStyle) Constructor to create a Typography. Typography equals(other: Any?) open Int hashCode() open String toString() TextStyle body1 body1 is the largest body, and is typically used for long-form writing as it works well for small text sizes. TextStyle body2 body2 is the smallest body, and is typically used for long-form writing as it works well for small text sizes. TextStyle button button text is a call to action used in different types of buttons (such as text, outlined and contained buttons) and in tabs, dialogs, and cards. TextStyle caption caption is one of the smallest font sizes. TextStyle h1 h1 is the largest headline, reserved for short, important text or numerals. TextStyle h2 h2 is the second largest headline, reserved for short, important text or numerals. TextStyle h3 h3 is the third largest headline, reserved for short, important text or numerals. TextStyle h4 h4 is the fourth largest headline, reserved for short, important text or numerals. TextStyle h5 h5 is the fifth largest headline, reserved for short, important text or numerals. TextStyle h6 h6 is the sixth largest headline, reserved for short, important text or numerals. TextStyle overline overline is one of the smallest font sizes. TextStyle subtitle1 subtitle1 is the largest subtitle, and is typically reserved for medium-emphasis text that is shorter in length. TextStyle subtitle2 subtitle2 is the smallest subtitle, and is typically reserved for medium-emphasis text that is shorter in length. Public constructors Typography(defaultFontFamily: FontFamily, h1: TextStyle, h2: TextStyle, h3: TextStyle, h4: TextStyle, h5: TextStyle, h6: TextStyle, subtitle1: TextStyle, subtitle2: TextStyle, body1: TextStyle, body2: TextStyle, button: TextStyle, caption: TextStyle, overline: TextStyle) Returns a copy of this Typography, optionally overriding some of the values. open operator Boolean copy(h1: TextStyle, h2: TextStyle, h3: TextStyle, h4: TextStyle, h5: TextStyle, h6: TextStyle, subtitle1: TextStyle, subtitle2: TextStyle, body1: TextStyle, body2: TextStyle, button: TextStyle, caption: TextStyle, overline: TextStyle) Returns a copy of this Typography, optionally overriding some of the values. open operator Boolean equals(other: Any?) open Int hashCode() open String toString() TextStyle body1 body1 is the largest body, and is typically used for long-form writing as it works well for small text sizes. TextStyle body2 body2 is the smallest body, and is typically used for long-form writing as it works well for small text sizes. TextStyle button button text is a call to action used in different types of buttons (such as text, outlined and contained buttons) and in tabs, dialogs, and cards. TextStyle caption caption is one of the smallest font sizes. TextStyle h1 h1 is the largest headline, reserved for short, important text or numerals. TextStyle h2 h2 is the second largest headline, reserved for short, important text or numerals. TextStyle h3 h3 is the third largest headline, reserved for short, important text or numerals. TextStyle h4 h4 is the fourth largest headline, reserved for short, important text or numerals. TextStyle h5 h5 is the fifth largest headline, reserved for short, important text or numerals. TextStyle h6 h6 is the sixth largest headline, reserved for short, important text or numerals. TextStyle overline overline is one of the smallest font sizes. TextStyle subtitle1 subtitle1 is the largest subtitle, and is typically reserved for medium-emphasis text that is shorter in length. TextStyle subtitle2 subtitle2 is the smallest subtitle, and is typically reserved for medium-emphasis text that is shorter in length. Public constructors Typography(defaultFontFamily: FontFamily, h1: TextStyle, h2: TextStyle, h3: TextStyle, h4: TextStyle, h5: TextStyle, h6: TextStyle, subtitle1: TextStyle, subtitle2: TextStyle, body1: TextStyle, body2: TextStyle, button: TextStyle, caption: TextStyle, overline: TextStyle) Returns a copy of this Typography, optionally overriding some of the values. open operator fun equals(other: Any?): Boolean open fun toString(): String Public properties val body1: TextStyle body1 is the largest body, and is typically used for long-form writing as it works well for small text sizes. val body2: TextStyle body2 is the smallest body, and is typically used for long-form writing as it works well for small text sizes. val button: TextStyle button text is a call to action used in different types of buttons (such as text, outlined and contained buttons) and in tabs, dialogs, and cards. val caption: TextStyle caption is one of the smallest font sizes. val overline: TextStyle overline is one of the smallest font sizes. It is used sparingly to annotate imagery or to introduce a headline. val h1: TextStyle h1 is the largest headline, reserved for short, important text or numerals. val h2: TextStyle h2 is the second largest headline, reserved for short, important text or numerals. val h3: TextStyle h3 is the third largest headline, reserved for short, important text or numerals. val h4: TextStyle h4 is the fourth largest headline, reserved for short, important text or numerals. val h5: TextStyle h5 is the fifth largest headline, reserved for short, important text or numerals. val h6: TextStyle h6 is the sixth largest headline, reserved for short, important text or numerals. val subtitle1: TextStyle subtitle1 is the largest subtitle, and is typically reserved for medium-emphasis text that is shorter in length. val subtitle2: TextStyle subtitle2 is the smallest subtitle, and is typically reserved for medium-emphasis text that is shorter in length. Serif or sans serif typefaces work well for subtitles.
